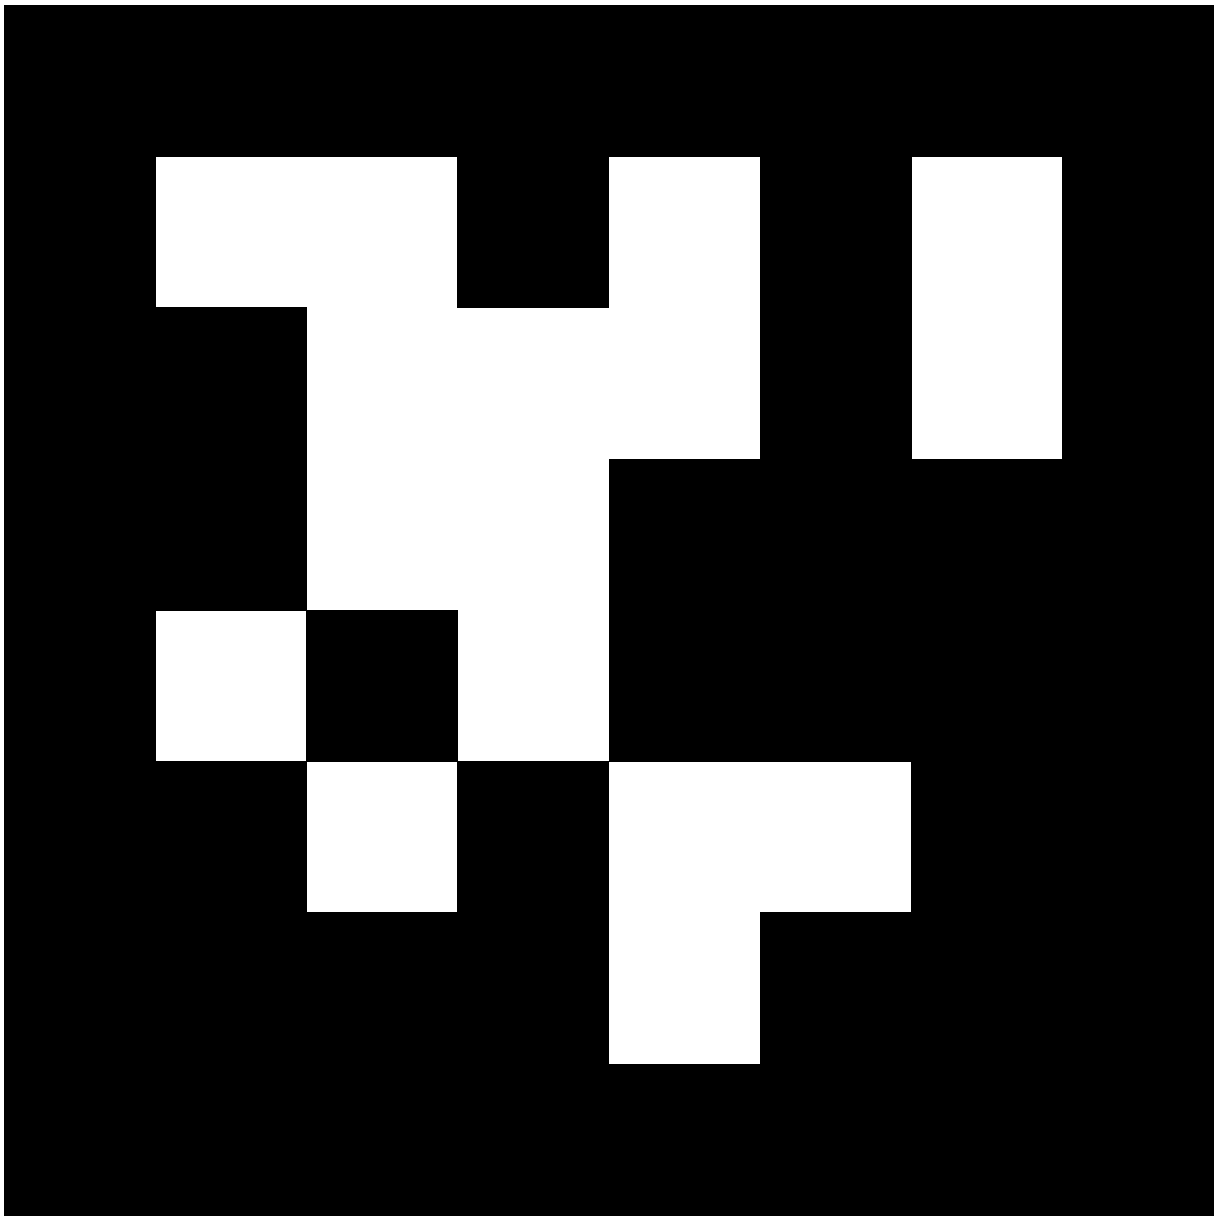
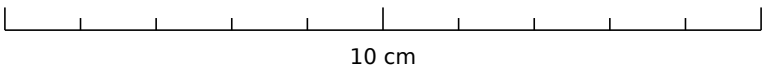
Simorgh: position tag

Print at 100% (Actual size), not "Fit to page". Keep the white border round the black square.
Check with a ruler: the black square must be 16.0 cm wide, and the bar at the bottom 10.0 cm.



Stick it flat and upright on a wall or pillar in the atrium, roughly facing where people stand,
at about eye height, where phones can see it. Tape all four corners. Once it is set up, don't move it:
every phone places the Simorgh from where this tag is.



AprilTag 36h11, ID 0 (AprilRobotics/apriltag-imgs, BSD 2-Clause). Tag size 16 cm (black square).
